### Professional Experience

Johnny has 38 years of aviation experience in a career heavily involved in regulatory control and oversight. Johnny was the FAA Assistant Division Manager for Flight Standards Southwest Region, responsible for thirteen Flight Standards District Offices and the regional Branch Manager. He was also responsible for the oversight of Federal Aviation Regulation compliance and certification of several major airlines, repair facilities, and airmen.

Johnny assisted the Division Manager in the oversight of the International Field Office (IFO) at DFW International Airport which had responsibility for regulatory oversight of all Mexican air carriers flying into the United States and for all U.S. certificated repair stations in Mexico. He served as the FAA Office Manager for the AMR Certificate Management Office (CMO) and the Continental Airlines CMO. Johnny was the Principal Avionics Inspector for Continental Airlines; Continental Express and several smaller air carriers.

Johnny's responsibilities have included implementation of policy for maintenance and certification programs for airlines, repair stations, flight schools, maintenance schools and special operations such as Reduced Vertical Separation Minimum (RVSM), Category II/III Minimum Landing, TCAS,

GPWS, Aging Aircraft maintenance and other inspection programs such as CAMP. He was a key advisor to the Director of Flight Standard Service on ATOS matters. He was the FAA's senior field management official for the transfer of the TWA Airlines Certificate to American Airlines.
