- State of Manufacture Obligations
- State of Registry
- State of Registry Obligations
- What is Article 83 bis?
- Significance of Article 83 bis?
- Case Studies
- State of the Operator
- State of the Operator Responsibilities
- Conducting Operations in a Foreign Country

- Links in the Safety Chain

Bilateral Agreements

- Economic
- Safety
- International Aviation Safety Assessment (IASA) Program
- Why is a BASA/MIP Important?
- U.S. Bilateral Countries
- Validation: One NAA Accepting the Findings of Another
- What's an Export?
- Aren't We Special?
- FAA Web Site Links
- Some Important Advisory Circulars
- Some Important Orders

U.S. – EU

- Draft BASA/IPA/MIP
- EASA Acceptance of PMA Design Approvals
- TCs and STCs: Aircraft, Engines and Propellers
- Design Changes by the TC or STC Holder
- Design Changes: Persons Other than the TC/STC Holder
- EASA Approval: Design Changes Today
- Repair Data
 - Why Is this Issue So Difficult?
 - Different Systems
- Repair Data Today
 - General: In Both Directions
 - U.S. to EU: Automatic EASA Approval
 - Critical Components: EASA Approval Required
 - EU to U.S.: Automatic FAA Approval
 - Alteration Data Today
 - Maintenance Today and Tomorrow

U.S. - Canada

- U.S.-Transport Canada MIP
 - All Repair Stations/AMOs
 - Repair Station Manual Supplement
 - Key Supplement Provisions

- Required TCCA Supplement Procedures
- 2003 Repair Data MOU

Another Model: U.S. - Australia

Doing Business in a Changing World

- What Regulations Apply?
- Bilateral Agreements
