3. To find all AD Rules applicable to a specific model:

When searching for all ADs applicable to a specific aircraft/engine/propeller, it is recommended to search using **ONLY** the Model field. Over time, models can be transferred to different Type Certificate Holders (manufacturers). Adding a manufacturer name to the Make field could limit the returned list of ADs.

- Click the "Model" drop down, use search field to type in the applicable model, and check the box or boxes (e.g. 737-700 Series)
- Click "Apply"
